

Google Classroom – No Attachments for assignment.

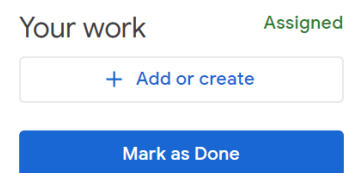

Sometimes Google classroom does not create the assignment document straight away. If you can not see the attachments you need to View the assignment, the file will be created for you (student).

You open your assignment and you see No Attachments or a blurred area beside Your work

Google sometimes does not create the assignment until the task is viewed. If the task does not appear when opened follow the steps below.

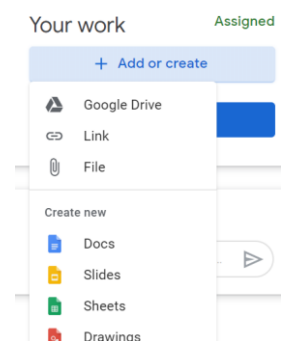

- 1) Click the classwork tab at the top
- 2) Click on the assignment title to expand the assignment
- 3) Click on "View Assignment"
- 4) Locate "Your Work" in the top right corner and click on the file with your name on it. This creates a copy for you to edit.
- 5) If 4 did not work, click on Create to make the file.

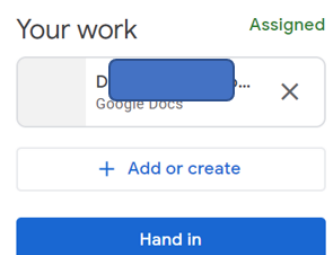

If the above steps did not work, create a New Document.

Click on Add or create

Then click on the new document your teacher has asked for. If you do not know which document to make, ask your teacher in the class comment. Found beneath view assignment. See example below. An email is sent to @learn.

Document now created with your name on it.

2 class comments

 Training Six 11:46
Hi Ms
I can not see the assignment document. Have tried all the fixes. What blank document do you want me to create?

 Karen Quigley 11:48
Hi
Create a blank google doc. If it was the spreadsheet ask me for a link to a spreadsheet I will create for you.
